CUSTOMER

ATM RIMINI

LOCATION

ITALY/ 2012

EQUIPMENT

MUNICIPAL BUS STATION FUEL DISPENSER

APPLICATION

DIESEL FUEL

PROVEN  
RESULTS

MUNICIPAL  
TRANSPORT BUS  
FUEL SYSTEMS  
PROTECTED  
AT THE PUMP

*ATM Rimini is so pleased with the results of OEI's scrubber that they are revamping 4 more bus stations. In the order for the dispensing machines, they have added a MUST clause stating that they request magnetic filtration on all of their fuels.*

### CHALLENGE

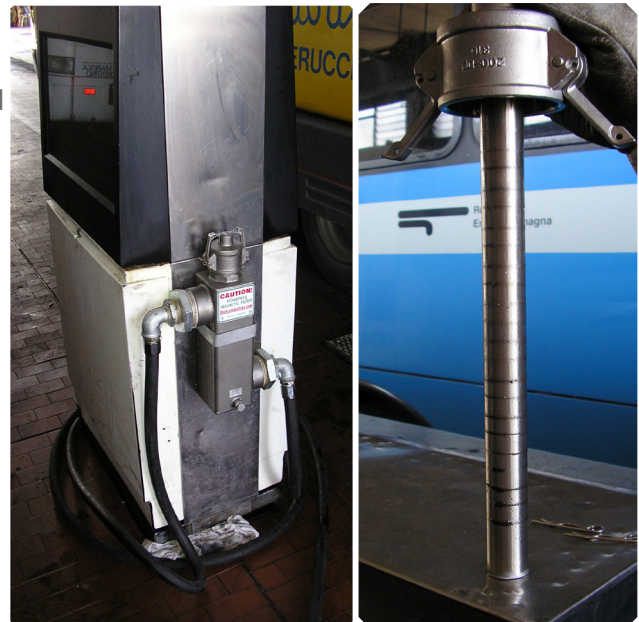

Remove sub-micron sized ferrous contamination from the diesel fuel being missed by the traditional paper spin-on filter on the dispensing pump.

### SOLUTION

Alex Priori of Renox, an OEI distributor in Italy, recommended installing an OEI magnetic filter scrubber on the diesel fuel dispensing pump after the traditional paper spin-on filter.

### RESULTS

Photos show the ferrous metal contamination captured on the magnetic filter element after 1 month of operation.

ATM Rimini is so pleased with the results of OEI technology that they are outfitting 4 more bus stations with magnetic filter scrubbers. When procuring new dispensing machines, they now include a clause requesting OEI filtration on all fuel systems.
